

Powered by Somnia

Pay anyone, anywhere.

Axios — borderless enterprise payroll settled on Somnia in under a second, with built-in compliance and machine-payable APIs for finance automation.

Borderless enterprise payroll · Confidential · 2026

THE PROBLEM

International payroll is **slow** and **expensive**.

\$47

Average cost per
international wire

2–5d

Settlement time on
bank rails

6.2%

Hidden FX spread
on remittances

Finance teams lose days reconciling wires, pay middlemen, and still lack audit-ready payment metadata on every salary.

WHY NOW

Somnia + remote work + machine payments

- High-throughput L1 — sub-second finality, EVM-native infrastructure
- Scale for payroll — batch payouts without network congestion
- Machine-payable APIs — agents pay per request, not shared credentials
- Global remote teams — demand for instant, low-cost settlement

THE SOLUTION

Global payroll that feels like **one click.**

For employers

Fund treasury in stablecoin, run batched payroll, earn yield on float, compliance built in

For employees

No crypto UX friction, instant balance, card spend, bank off-ramp

Axios replaces multi-day settlement with atomic batch execution, protocol-level screening, and ISO 20022 memos attached to every payment.

PRODUCT

WHY SOMNIA

Built for **real-time money**

Employer wallet

PayrollBatcher

ComplianceRegistry

47 employees

- Native stablecoin settlement — audited on-chain protocol suite
- Sub-second finality — entire payroll run settles in one block
- On-chain Reactivity — event-driven automation without off-chain watchers
- EVM-compatible — enterprise-grade tooling and security practices

WHY ON-CHAIN

Remove the chain, **this breaks**

- Atomic multi-recipient settlement
- ComplianceRegistry enforced at protocol level
- Auditable memos & on-chain receipts

MACHINE PAYMENTS

Agents pay per call

Programmatic APIs for compliance, treasury, and payroll execution — billed per request. No shared credentials with unlimited exposure.

TRACTION

End-to-end platform, live today
